Good morning. We would like to have a brief follow-up call this morning on the data that you sent yesterday, Faye. Would 8:30-9:00 or 9:30-10:00 work for you?

Cindy Wheeler

Thanks, Faye. We may have some follow-up questions—would you be available for a conference call this afternoon or tomorrow?

Faye, thanks for your help in tracking down the data on carbon tetrachloride that we would like to use in our risk evaluation. I am just back in the office from a vacation, and I am still getting up to speed on what has happened while I was out. But in looking back through the emails from the last 10 days, it looks like we were expecting Excel files with data from the two involved companies. The file you attached this morning was a summary PDF of Company B's short term/task samples, with just dates and results.

Are you still waiting on the Excel files from the companies, or have I missed something? As I'm sure you know, we would need other information, including the approximate sample frequency, task description, sample date, and sample duration in order to use the sample results.

We are available to chat if that would be helpful, just let us know. And I do apologize if I've misunderstood where things stand.
